Importance: High

See below. These may be repeats from the CPC notice. I will check when I get to the office.

I have left messages for each of you to call me. In one of the messages I noted to you that CC Hill has contacted the Planning Dept and he told them that he would likely request that the case be held.

Please call me. I don't understand why you would wait until now to tell me darren is no longer wkg on the case. Had I know there was a material change on your end we could have approached this differently. If it is held for two weeks you still have time b/4 the end of the month to try and work with the abutting homeowners. If hill moves to hold it there is nothing I can do to change that.

Suzan:

I went to the City and obtained copies of the notice replies for the above-referenced matter. I obtained 10 responses. Of those responses: 2 were not filled out correctly (and they were both opposed), 3 are in favor and 5 are very much opposed. Of the 5 opposed replies, one reply is from the President of the Village by the Creek H/O Association who also owns 30 units within that development. One of the other opposed replies is from the Property Manager of Village by the Creek who stated in his comment that he has previously requested copies of the Environmental Impact Study and the Economical Impact Study and has received neither. He is also requesting a 60-day postponement and that if this request continues to go unanswered and the project is "crammed down our throats" without full disclosure, they will litigate.

Copies of the notices have been placed in your chair.
